Profile

Lead Front-End Developer with 10+ years of experience in software development and 7+ years specializing in Angular and TypeScript. Expert in building scalable architectures with Angular v20, utilizing Signals and RxJS for high-performance reactivity. Proven track record leading distributed teams, achieving 100% Veracode security compliance, and ensuring zero-downtime releases. Dedicated to delivering high-quality web applications aligned with business growth and fast-paced release cycles.

Work Experience

08/2025 — PRESENT

Lead Front-End Portal Registro Biometrico Minsait - Telcel

- Configured and launched Angular v20 project using Atomic Design architecture for scalable front-end application structure.
- Developed reusable components, interfaces, services, constants, pipes, routes, and shared modules to ensure modularity and maintainability.
- Authored clean, well-documented, and tested TypeScript code adhering to best practices and code quality standards.
- Designed responsive user interfaces aligned with project requirements and accessibility standards.
- Implemented application routing and state management using Signals for efficient data sharing across components.
- Resolved security vulnerabilities achieving 100% compliance in Veracode scans, enhancing application robustness.
- Deployed application on Nginx server with error handling and zero-downtime release processes for production stability.
- Integrated slider-captcha to prevent bots and clickjacking attacks, improving application security.
- Conducted Angular v20 to React v19 migration for framework comparison and performance analysis to inform technology decisions.

09/2024 — 07/2025 CDMX

Lead Front-End - Loyalty Santander

- Configured and launched Angular v18 project, integrating Santander's UI FLAME and third-party libraries like Moment and sweet-alert for date handling, filtering, pagination, and search.
- Developed reusable components, interfaces,

Work Experience

services, constants, pipes, routes, and shared modules following front-end application architecture principles.

- Implemented JSON service consumption with TypeScript for dynamic data handling and interactive form management.
- Designed responsive, user-friendly screen interfaces aligned with Figma design prototypes.
- Authored clean, well-documented, and thoroughly tested code ensuring high code quality and maintainability.
- Managed application routing and navigation for seamless user experience.
- Utilized npm for installing and managing project dependencies and build tooling resources.
- Conducted pull requests and error handling during release cycles to maintain production-grade software standards.

12/2023 — 08/2024

Front-End CI-Banco/ Gestor Documental CI-Banco

- Configured Angular 17 project with dependency installation and integrated Bootstrap v5.2.3, RxJS, Angular Material, and npm packages including crypto-js and @ngrx for state management, enabling efficient data access and manipulation.
- Developed reusable components, interfaces, services, constants, pipes, routes, and shared UI elements following Angular best practices and front-end application architecture principles.
- Implemented form data handling, data visualization, and RESTful service consumption using TypeScript, enhancing user interface responsiveness and functionality.
- Encrypted user passwords and managed application profiles to ensure security compliance and user data protection.
- Collaborated closely with engineers, product managers, and UX designers to analyze business requirements, identify gaps, and implement new features and critical bug fixes.
- Authored clean, well-documented, and thoroughly tested code to maintain high code quality and facilitate code reviews.
- Handled application routing and navigation, improving user experience through seamless transitions between views.
- Utilized npm for installing additional resources and build/deploy tooling, supporting efficient development workflows.
- Documented user manuals and technical guides to

Work Experience

- migration to Angular version 15.2.8 with Node.js 18.15.0, replacing JSP with components, interfaces, services, constants, pipes, routes, and shared components to modernize front-end architecture.
- Integrated Bootstrap v5.2.3, RxJS, ngx-spinner, and npm plugins including DataTables for data visualization, Moment for date handling, FileSaver for file downloads, and xlsx/csv support to manage large datasets effectively.
 - Built responsive, accessible UI with precise data filtering, pagination, and search capabilities, enhancing user experience and front-end application architecture.
 - Tested APIs using Postman, reviewed data models and interfaces, and utilized Swagger for service visualization to ensure code quality and robust RESTful web services integration.
 - Implemented HTTP service requests, created promises and observables, and shared data across components using RxJS operators to maintain scalable, reusable web components.
 - Managed application routing to ensure smooth navigation and consistent user interface flow.

10/2021 — 08/2022

Mex Front End Specialist Santander Global Facilities S.A. de C.V. / ClictwoSell Santander

- Created UI prototypes aligned with Figma and Miro designs, ensuring responsive web design and accessibility compliance.
- Developed data models using classes and interfaces for type-safe TypeScript code, following documented best practices.
- Wrote unit tests for new components to ensure code quality and maintainability.
- Implemented microservices integration and business logic binding to views for scalable, reusable Angular components (Angular 7 to 9 migration).
- Debugged applications using iOS and Android simulators, enhancing cross-platform compatibility.
- Developed products including Home Insurance, Credit Card LikeU, and improved workflows for Shield and Hospitalization Insurance.
- Resolved production issues promptly, ensuring zero downtime and fault tolerance in software releases.
- Implemented Google Optimize to enhance product performance and user engagement.

Skills

— FRONT-END DEVELOPMENT

Angular	Advanced
TypeScript	Advanced
JavaScript	Advanced
Responsive Web Design	Advanced
RESTful Web Services	Intermediate

Skills

— FRONT-END DEVELOPMENT

RxJS	Profesional
HTML, CSS3	Avanzada

— SOFT SKILLS

Ability To Collaborate Effectively	Advanced
Interpersonal Skills	Advanced
Respecting Timelines	Advanced
Team Commitments	Advanced

Atomic Design	
Code Documentation	
Security Compliance	
Accessibility	
Code Quality	
Problem Solving	
UI Prototyping	

Education

2011 — 2016

Bachelor's Degree in Computer Systems Engineering
Instituto Tecnológico Superior de Huetamo Michoacán

Master's student in Artificial Intelligence (AI) at the National Institute of México.

Tech abilities

— PROGRAMMING LANGUAGES & FRAMEWORKS

Node.js
RxJS
Angular

— DATABASES

MySQL
Oracle
SQL Server
MongoDB

— BUILD/DEPLOY TOOLING & PLATFORMS

GitHub Actions
npm
Nginx

Languages

Spanish - Native
English - B1
